

The image is a composite background. The left side shows an industrial facility with several large, cylindrical stainless steel tanks connected by a network of pipes and valves. A set of stairs leads up to one of the tanks. The right side shows a warehouse interior with a high, arched metal roof. Numerous blue metal barrels are stacked on wooden pallets, extending into the distance. The lighting is bright, suggesting an indoor or well-lit outdoor environment.

ANFAL INDUSTREIS & TRADING CO.

ABOUT US.

Anfal Industries & Trading Co, is one of the leading chemical manufacturer and distributor in Oman, established in 2016 in Sultanate of Oman ,Specialized in Manufacturing of industrial and cleaning chemicals and Distributor of Industrial Chemicals, Water Treatment Chemicals, Swimming Pool Chemicals, Laundry chemicals, Textiles Chmicals, Paper Industry Chemicals and so forth. specifically designed to meet the requirements of wide array of markets. During our crucial business years we have earned goodwill and loyalty of our customers following our motto

“Quality we believe, Satisfaction we deliver”

With continuous availability of quality service for our clients. We hold a large part of the market with over 100+ variant products delivered to the clients and aims to grow throughout the business life cycle with continued support and growth of our employees.

We aim at maintaining customer loyalty and satisfaction by providing them with the most upgraded and best quality products which are not only of the top grade but also improve the service of our clients thereby increasing our goodwill.

MISSION

We focus strongly on customer satisfaction, quality and reliability. It is our mission to be the supplier of choice to our customers and to build strong and enduring relationships. We meet customers' needs and contribute to their success with timely deliveries and cost-effective solutions.

VISION

Our main objective is to deliver high quality materials at competitive prices combined with better services and thereby becoming a market leader in the chemical supplies industry in the Middle East.

Quality Policy

The ANFAL INDUSTRIES & TRADING CO. is committed to providing products and services of superior quality and value that improve the lives of consumers. As part of this, we strives to improve the environmental quality of our products, packaging and operations in the GCC.

OUR PRODUCT.

- **LAUNDRY CARE.**
- **INDUSTRIAL CHEMICALS.**
- **CAR WASH CHEMICALS.**
- **Poultry Farm and Dairy Farm Chemicals.**
- **House Hold and Cleaning Chemicals**

OUR PRODUCT.

We are leading chemical company in Oman with various chemical business activities. We are distributor of:-

- ❖ Industrial Chemicals,
- ❖ Water treatment chemicals.
- ❖ Swimming Pool Chemicals.
- ❖ Laundry Chemicals.
- ❖ Detergent chemicals.
- ❖ Manufacturing of Laundry Chemicals.
- ❖ Manufacturing of Car wash chemicals.
- ❖ Poultry and Dairy Farm chemicals.
- ❖ Paper mill Chemicals.
- ❖ Textiles Chemicals.
- ❖ etc...

CHEMICALS

SODIUM HYPOCHLORITE 15%

CALCIUM HYPOCHLORITE 70%

SODIUM HYDROXIDE LYE 50%

SODIUM HYDROXIDE FLAKES 99%

HYDROCHLORIC ACID 30-35%

AQUESE FORMALDEHYDE 37%

SODIUM CARBONATE (SODA ASH LIGHT GRADE)

CITRIC ACID

DISTILLED WATER

POULTRY FARM AND DAIRY FARM CHEMICALS.

We Offer PoultryFarm and Dairy Farm Chemicals .We provide our clients, with an accurately composed range of chemicals that is extensively used in poultry and related industries.

- SODIUM HYPOCHLORITE 15%.
- SODIUM HYDROXIDE LYE 50%
- FORMALDEHYDE 37%
- SODIUM HYDROXIDE FLAKES 99%

LAUNDRY CARE PRODUCTS.

BLEACH

COMFORT FABRICS

DETERGENT POWDERS.

SODA ASH LIGHT GRADE

PERFUMES

HANGERS.

PLASTIC KEES AND ROLLS.

SPOTE REMOVALS.

Etc..

SODIUM HYPOCHLORITE (NaOCl) 15%

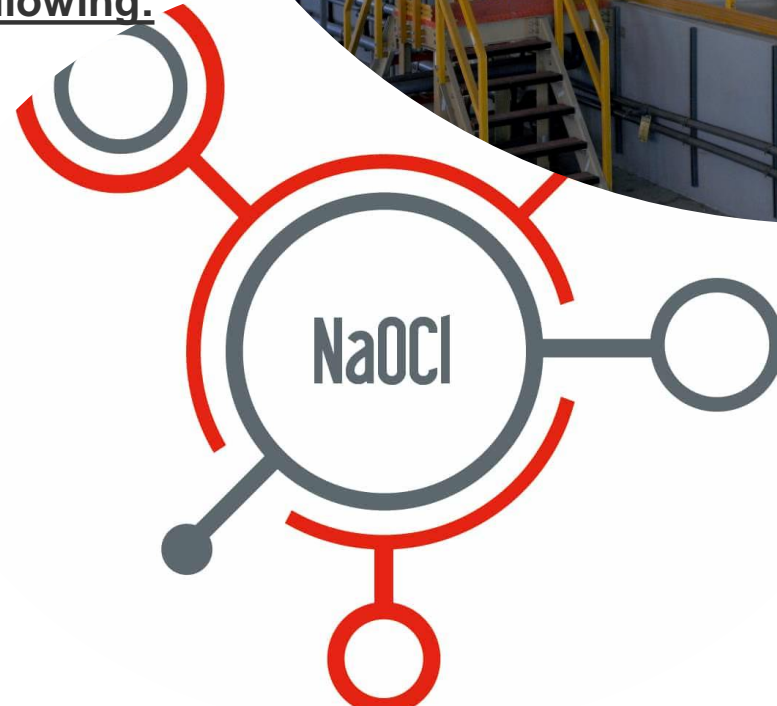

Sodium hypochlorite (NaOCl) is a compound that can be effectively used for water purification. It is used on a large scale for surface purification, bleaching, odor removal, and water disinfection.

Sodium Hypochlorite consuming industries are as following:

- Bleaching
- Stain Removal
- Disinfection/Sanitation
- Deodorizing
- Water Treatment

CAS NO : 7681-52-9

PACKING: 20 LTR, 200 LTR, 1000 LTR IBC TANK.

SODIUM CARBONATE (SODA ASH LIGHT GRADE)

Application

Soda ash, the trade name for sodium carbonate (Na_2CO_3), is a white, anhydrous, powdered or granular material. It is an essential raw material used in the manufacturing of glass, detergents chemicals, and other industrial products. Soda ash is made in three main grades - light, and dense.

Sodium carbonate consuming industries are as following:

- Pharmaceuticals, Preservatives
- Photographic chemicals
- Rubber, Sugar, Textile industries
- Soil disinfection chemicals
- Water treatment industry

CAS NO : 497-19-8

CHEMICAL FORMULA

PACKING: 25 KG BAG.

CALCIUM HYPOCHLORITE 70%

Application

Calcium hypochlorite is one of the best chemical disinfectants for water, better than household bleach by far. It destroys a variety of disease causing organisms including bacteria, yeast, fungus, spores, and viruses. Calcium Hypochlorite is widely available for use as swimming pool chlorine tablets or white powder that is much more stable than chlorine. This is often known as “pool shock”.

Calcium hypochlorite consuming industries are as following:

- Bleaching
- Stain Removal
- Disinfection/Sanitation

CAS NO : 7778-54-3
CHEMICAL FORMULA : $\text{Ca}(\text{ClO})_2$
PACKING : 45 KG DRUM.

HYDROCHLORIC ACID (HCL) 31-33 %

Application

Hydrochloric acid has many uses. It is used in the production of chlorides, fertilizers, and dyes, in electroplating, and in the photographic, textile, and rubber industries.

HCL Consuming Industries are as follow:

- Activation of Petroleum process
- Water Treatment
- Food Processing
- Manufacture of Chlorine Dioxide
- Catalyst in Organic Process
- Removal of heavy metals from Carbon Black and activated Carbon
- Leaching Alumina from Crystalline Zeolites
- Hydrolyzing Agent
- Pickling in metal industries

CAS NO : 7647-01-0

CHEMICAL FORMULA : HCL

PACKING : 200 liter pvc drums

Caustic Soda Flakes (NaOH) >99.5% (Dry basis)

Application

Sodium hydroxide is a popular strong base used in the industry such as Chemical pulping, Tissue digestion, Dissolving amphoteric metals and compounds, Esterification and transesterification reagent and Food Preparation.

Caustic Soda Lye Consuming Industries are as following:

- Pulp and Paper
- Textiles
- Soap & Detergents
- Petroleum Products
- Aluminum Metal
- Chemical Process
- Bleach Manufacturing
- Water Treatment

CAS NO : 1310-73-2
CHEMICAL FORMULA : NaOH
PACKING : 25 KG BAG.

Caustic Soda Lye (NaOH) 50.0%

Application

Caustic Soda Lye is one of the most widely used chemicals in the industry. Caustic soda is a solution of Sodium hydroxide (NaOH) in water. It is a strong base with a wide range of applications in different industries. Worldwide, the major users of caustic soda are the aluminum industry, pulp & paper and the chemical industry. The main applications are water treatment and water purification, as a cleaning agent, or a wide range of uses in the chemical industry like starch production or for the desulphurization in the petrochemical industry.

Caustic Soda Lye Consuming Industries are as following:

- Pulp and Paper
- Textiles
- Soap & Detergents
- Petroleum Products
- Aluminum Metal
- Chemical Process
- Bleach Manufacturing
- Water Treatment

CAS NO : 1310-73-2

PACKING: 20 LTR, 200 LTR, 1000 LTR IBC TANK.

AQUEOUS FORMALDEHYDE(AF-37)

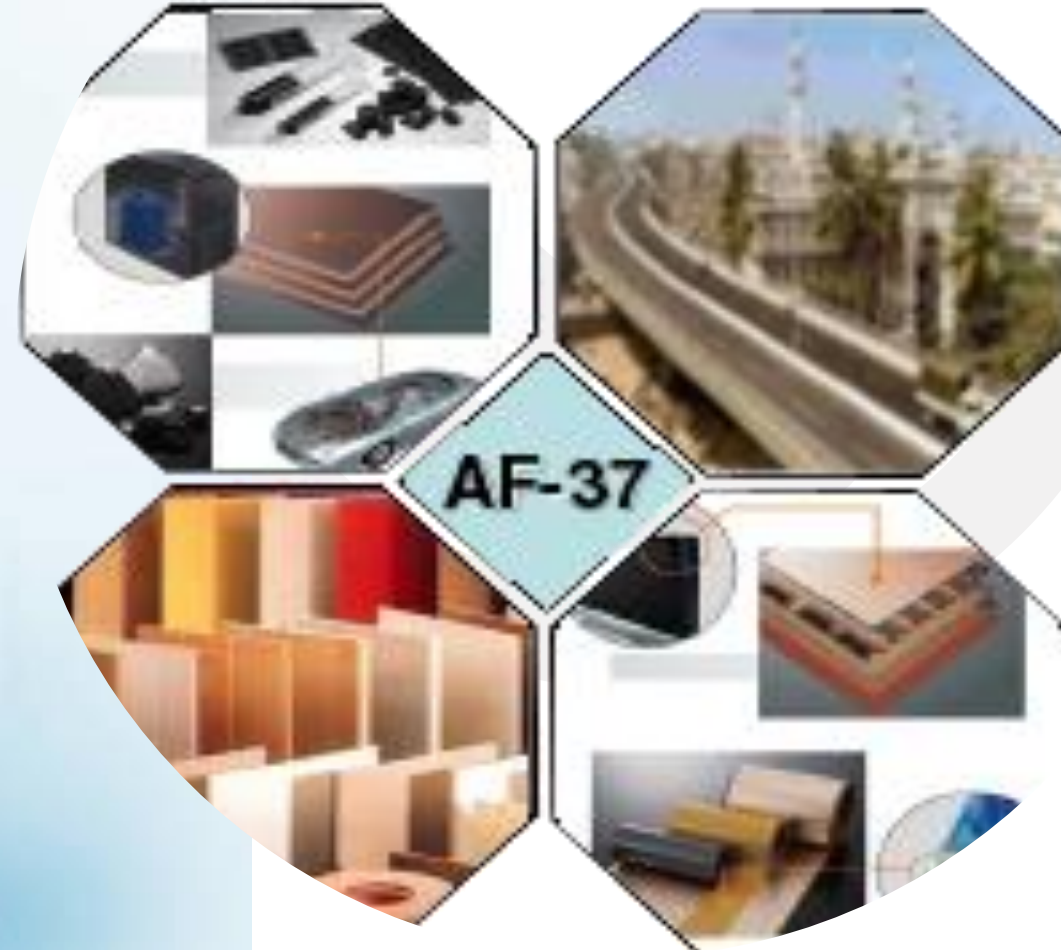

Formaldehyde (formalin) is **produced by oxidation of methanol**. It is made of 37% formaldehyde and impurities such as methanol, small amounts of formic acid, aldehydes and ketones. It is used as a denaturant in formaldehyde-agarose gel electrophoresis of RNA.

Formaldehyde consuming industries are as following:

- Pharmaceuticals, Preservatives
- Photographic chemicals
- Rubber, Sugar, Textile industries
- Soil disinfection chemicals
- Water treatment industry

CAS NO : 50-00-0

PACKING: 32.5kg, 225 kg.

DISTILLED WATER

Distilled water is used for **sterilizing medical equipment, lead-acid batteries, automotive cooling systems, and other devices where mineral buildup would cause damage.** The absence of other minerals and contaminants makes it ideal for use in skin products, canning products, and cleaning laboratory equipment.

CITRIC ACID

It is used to **preserve and marinate meats, and flavor foods and beverages**. For example, citric acid is used in wine to reduce low acidity and improve taste. Citric acid is also used in cosmetic and personal care products as a preservative, and in cleaning products to remove hard water build up.

CAS NO : 77-92-9

CHEMICAL FORMULA: $C_6H_8O_7$

PACKING: 25 KG BAG
